DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Applicants have not responded to the objection to the specification set forth in the prior Office Action regarding the requirement for Applicants to update the status of all applications to which priority is claimed.

Drawings

3. Applicants have not responded to the objections to the Drawings set forth in the PTO-948 attached to the Official Action mailed 8-09-2001. Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.

Response to Arguments

4. Claims 42, and 44-75 remain rejected under 35 U.S.C. 102(e) as being anticipated by Choi et al.

Applicant's arguments filed 2-22-02 have been fully considered but they are not persuasive. Applicants traverse the instant rejection on the grounds that the prior art reference does not disclose each and every aspect of the claimed invention as amended. In particular, Applicants argue that the Choi et al. reference does not teach wherein the nucleic acid in the particles of instant invention is resistant in aqueous solution to degradation with a nuclease. However, contrary to Applicant's assertions, because the prior art compounds meet the structural limitations of the claimed compounds, the prior art compounds are presumed to have the same functional properties as Applicant's claimed compounds. Applicants have not provided any

evidence of unexpected results that would suggest that the particles synthesized by the methods taught in the specification are unobviously distinct from the liposomal compounds of Choi et al. Applicants further argue that the particles of the present invention are construed in a way such that upon removal of a solubilizing component (*i.e.* detergent or an organic solvent), the nucleic acid becomes protected from degradation. However, it is noted that the instant claims are drawn to a product, and not to a method for the synthesis of the claimed product. Additionally, although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

See also MPEP § 2112 which states that "[w]here the claimed and prior art products are identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a prima facie case of either anticipation or obviousness has been established." *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977). In the instant case Applicants have not provided any evidence ^{by 3/16/92} ~~that the claimed~~ that the prior art products do not necessarily possess the characteristics of the claimed product. "When the PTO shows a sound basis for believing that the products of the applicant and the prior art are the same, the applicant has the burden of showing that they are not." *In re Spada*, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). Moreover, "[p]roducts of identical chemical composition can not have mutually exclusive properties." A chemical composition and its properties are inseparable. Therefore, if the prior art teaches the identical chemical structure, the properties applicant discloses and/or claims are necessarily present. *In re Spada*, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
